DATABASES:
- MongoDB
- PostgreSQL
- MySQL

BACK-END/ FRAMEWORKS:
- C/C++
- Java
- Python
- RESTful API

- Node.js
- Ruby/Rails
- PHP

OTHER:
- Version control
- CLI

Knowledge of: Data Structures and Algorithms, Operating Systems, Distributed Computing

EDUCATION —

08/2016 – 05/2020

Bachelor of Science: Computer Science and Physics

University of Southern California – Los Angeles, CA

WORK AND VOLUNTEER EXPERIENCE

Freelance Full Stack Web Developer – *05/2020 - Current*
Self-Employed, Los Angeles, CA

- Maximized applications' efficiency, data quality, scope, operability and flexibility.
- Used various ideas from distributed computing, large-scale design, and data storage to solve challenging dataset problems.
- Developed app integration with REST/SOAP and other APIs for social media logins, payment processors, and other services.

Volunteer Coding Instructor – *01/2019 – 05/2019*
Joint Educational Project at USC, Los Angeles, CA

- Executed fun weekly coding lessons for fifth grade students to inspire the future generation of computer scientists and engineers.
- Instructed students on the fundamentals of logic, problem solving, and programming.

RECENT PERSONAL PROJECTS

YelpCamp - github.com/toriecr/YelpCamp
A Node.js CRUD app that is like Yelp.com, but for campgrounds.

- Designed database schemas, models, controllers and routes with MongoDB and Express.js.
- Customized dynamic user views with EJS.
- Implemented authentication and authorization with Passport.js.

Twitter Clone - github.com/toriecr/sample_app
A social media app made with Ruby on Rails.

- Accomplished authentication from scratch by configuring the Sessions controller, User model, and a password digest.
- Built routes for user CRUD functionalities for tweets.
- Designed model to enable users to follow one another and generate dynamic user views accordingly.
